

Smart Cookie Rewards Platform

What is Smart Cookie Reward Platform?

Smart Cookie is a teacher-student reward program designed to foster a fun, interactive, and rewarding environment for both teachers and students. The program allows teachers and to recognize and reward students for their achievements in various activities, such as sports, drawing, class tests and more. This initiative aims to make the educational process more engaging and motivating by providing real-time rewards that acknowledge students' efforts and accomplishments. By doing so, it encourages students to strive for excellence and feel appreciated, leading to increased motivation and a more competitive environment. This platform can be extended to Player-Coach Rewards and Employee Manager Rewards

Instant Appreciation, Recognition and Rewards

It is often noticed that students' outstanding performances go unacknowledged and the dedicated teachers who shape their careers from the start are rarely recognized for their efforts. If we fail to appreciate those who deserve it, they may stop doing the things we value. Our program addresses this issue by providing a platform where students and teachers can receive timely recognition for their achievements. As we know, rewards are crucial in promoting good work and bringing out the best in individuals. In this context, our program offers points as a token of appreciation from teachers to students for their accomplishments in various areas, such

as academics, sports, arts, and community service. Similarly, students can thank their teachers for their dedication, guidance, mentorship, humor and cooperation.

Point Distribution and Reward Flow

The point distribution process in Smart Cookie operates as follows:

1. **Cookie Admin:** The cookie admin distributes points to the Group Admin, which represents an organization comprising multiple colleges or schools.
2. **Group Admin:** The group admin then distributes these points to the School Admin.
3. **School Admin:** The school admin is a crucial entity in the Smart Cookie system. They distribute Green Points (Reward Points) to teachers and Blue Points (ThankQ Points) to students for further distribution.
4. **School Admin Data:** The school admin maintains detailed information about the school, including:
 - Teacher and Student count
 - Non-teaching staff
 - Parents
 - Subjects
 - Students per semester
 - Students per subject
 - Teacher per subject
5. **Data Upload:** The school admin uploads an Excel file containing all school data to the system.
6. **Point Request:** If a Smart Cookie member lacks sufficient points to generate a coupon, they can request the necessary points from a friend.

Point Types and Flow:

The Smart Cookie system features a rule engine where school/college admins set rules that all members must follow. The various types of points available include:

1. Blue Points: "ThankQ" points awarded for special efforts in mentoring, motivation etc.
2. Green Points: "Reward Points" Distributed by teachers to students for their academic performance.
3. Brown Points: Referral points or Sponsor Points.
4. Purple Points: Used by parents to reward their children.
5. Parent-Teacher Blue Points: Parents can Thank teachers for mentoring their children.
6. Water Points: Points that can be purchased.

These points are designed to encourage and motivate students and teachers alike, fostering a positive and rewarding environment.

Redeeming Points:

Smart Cookie points can be redeemed by students and teachers in various ways within a year of issuance. Here are the ways to redeem points:

1. Coupons and Discounts: Redeem points for free products or discounts at registered cafes, eating joints, movie theaters, beauty parlors, book shops, and sport equipment shops.
2. Soft Rewards: Use points to earn trophies, medals, crowns or stars. These soft rewards can be included in their resume, serving as a recognition of their achievements within the

college and among their family and friends.

All redeemed points are recorded in the system. Whenever a record of achievement is demanded by an organization or individual, the points can be instantly produced using the member ID of the person.

Self-Motivation and Social Media Integration:

Smart Cookie offers a unique self-motivation feature, where active members on social media platforms like Facebook, WhatsApp, Amazon, Twitter, LinkedIn, and Quora can earn reward points simply by logging in. These points are automatically credited to their accounts, providing a sense of popularity and benefits.

Additionally, generated coupons can be directly posted on social media platforms, such as Facebook, for easy access.

Smart Cookie is accessible not only through its website but also through Android applications. The app and website are designed to be user-friendly, making it easy for users to navigate and use it daily. Separate apps are available for teachers, students, parents and sponsors.
